

HIGH ALTITUDE SEASON EXTENSION RESEARCH BEDS

Telluride 8,750', Teller County, 9,000', Eagle County, 6700'

Clockwise from the top:

- spring and summer lettuces
- green beans
- the beds in winter
- the new Solexx covered bed
- watering winter greens

Cool Season Crops grow best (yield and quality) under double layer of Dio-betalon and 30% row cover fabric;
Warm season crops grow exponentially better under cover but the Solexx greenhouse cover produced best
